Maine Health Data Organization Hospital Financial Data Release Notes - December 2022

Overview

The MHDO Hospital Financial Reports were designed to standardized the reporting of key hospital financial indicators to allow for comparisons across hospitals; however, given the complexities in the hospitals structure and in accounting practices, leading to scenarios where the way in which a hospital and its activities are reported in an unconsolidated form are more comparable to another hospitals consolidated reporting. For example, some physician practices are departments of the hospital (and would be included in the hospitals unconsolidated reporting) where for another hospital the physician practices are a subsidiary of the hospital (and would not be included in the hospitals unconsolidated reporting but rather captured in the hospitals consolidated reporting).

Consolidated vs. Unconsolidated Reporting

The primary difference between consolidated and unconsolidated reporting is that the consolidated form reports all activities of a health system and its subsidiaries as a combined entity, while the unconsolidated financial statements report activities as a separate entity. For consolidated health system data see Report IV.

Ratio Categories

Profitability Ratios:

Provides information on the ability of the organization to produce a profit. Few hospitals could remain financially viable without a profit (or excess of revenues over expenses), especially over a long period of time. Cash flow would not be sufficient to meet normal cash requirements such as debt principal and investment in fixed or current assets. Six measures of profitability are included:

- Operating Margin
- Non-operating Revenue Margin
- Total Margin
- Return on Equity
- Net Operating Income (Operating Surplus or Loss)
- Total Surplus/Deficit (Total Surplus or Loss)

Liquidity Ratios:

Measures an organization's ability to meet short-term obligations, collect receivables, and maintain cash position. Most organizations that experience financial problems do so because of a liquidity crisis; they are unable to pay current obligations as they become due. Five measures of liquidity are included:

- Current Ratio (Without Board Designated and Undesignated Investments)
- Days in Accounts Receivable
- Days Cash on Hand (Current)
- Days Cash on Hand (Including Board Designated and Undesignated Investments)
- Average Payment Period (Current Liabilities)

Capital Structure Ratios:

Measures how an organization's assets are financed, and its capacity to pay for new debt. Many long-term creditors and bond rating agencies carefully evaluate capital structure ratios to determine an entity's ability to increase its amount of debt financing. Four capital structure ratios are included:

- Equity Financing
- Debt Service Coverage
- Cash Flow to Total Debt
- Fixed Asset Financing

Asset Efficiency Ratios:

Measures the relationship between revenue and assets. The numerator is always revenue that may be thought of as a surrogate measure for output. The denominator is investment in some category of assets that may be thought of as a measure of output. Two asset efficiency ratios are included:

- Total Asset Turnover
- Fixed Asset Turnover

Other:

These are other select ratios/data elements of interest to financial data users. These ratios/data elements are included but cannot be classified into the other categories of financial ratios. One ratio and sixteen data elements from the financial data template are included:

- Average Age of Plant (Depreciation Only)
- Net Plant, Property, Equipment
- Cash & Investments (Current Assets)
- Current Assets Whose Use is Limited
- Trustee-held Investments
- Board-Designated & Undesignated Investments
- Fund Balance-Unrestricted
- Temporarily Restricted Net Assets
- Permanently Restricted Net Assets
- Total Gross Patient Service Revenue
- Net Patient Service Revenue
- Total Non-operating Revenue
- Bad Debt (Provision for Bad Debt)
- Free Care (Charity Care)
- Total Operating Expenses
- Total Advertising Expenses
- Salaries and Benefits
